

PRODUCT NAME
TYRE SHINE ULTRA

DESCRIPTION & APPLICATIONS
<p>Tyre Shine Ultra creates a high gloss “wet look” on rubber tyres or matt plastic surfaces giving a durable high gloss look in one easy application. It deepens the colour and repels water. The “as new” appearance of Peak Tyre Shine Ultra will compliment cleaned alloy rims or a freshly waxed paint finish.</p> <p>Suitable also for older style matt black bumper bumpers on 1990 series passenger vehicles and commercials. Tyre Shine will also remove bugs and tar from painted surfaces.</p> <p>Before applying, clean the tyre wall or external surface and allow to fully dry. Apply Tyre Shine by cloth, spray or brush. Tyre Shine Ultra contains siloxanes and hydrocarbon solvent and is safe on all external surfaces. Buff off residual to prevent dust pick up.</p>

FEATURES & BENEFITS
<p>Peak Tyre Shine Ultra only takes one coat. Instantly the tyre will reflect a new tyre look.</p> <p>Repeated applications will further enhance gloss and appearance.</p> <p>It is not suitable for vinyl or leather interiors and dashboards as the solvent may cause drying out and cracking. In addition, due to the friction reducing characteristics of this product, please avoid spraying onto brake disc rotors as reduced braking efficiency may occur. To clean off disc rotors use Peak Parts Wash, Solvent B or Kerosene.</p>

HEALTH / SAFETY & ENVIRONMENT
<p>Health, safety and environmental information are provided on the Material Safety Data Sheet for this product. Users should consult the MSDS, follow the precautions outlined and comply with all laws and regulations concerning its use and disposal.</p>

Appearance	Clear, colourless liquid with a hydrocarbon solvent odour.
Sp. Gravity	0.79
Flash Point	-30 C
Solubility	Insoluble
