

## SAFETY DATA SHEET

## According to Work Health and Safety Regulations 2011 and National Model Code of Practice for the

### preparation of Safety Data Sheets for Hazardous Chemicals

Version 1.0

Issue date: 09/07/2022 Revision date: 09/07/2022

SDS Record Number: CSSS-TCO-010-117593

| Material name:                      | ATF IID Automatic Transmission Fluid                                                                                                                                                                      |
|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Other means of identification:      | -                                                                                                                                                                                                         |
| Recommended use:                    | Suitable for automatic transmission, hydraulic transmission systems of vehicles; Suitable for automatic transmission system, power steering system and other hydraulic systems of construction machinery. |
| Restrictions on use:                | -                                                                                                                                                                                                         |
| Manufacturer:                       |                                                                                                                                                                                                           |
| Australia Supplier(Manufacturer):   | International Lubricant Distributors Pty. Ltd.                                                                                                                                                            |
| Address:                            | 21 Logistics Boulevard, Kenwick WA, 6107 Australia                                                                                                                                                        |

### 2. Hazards identification

### Australia:

Not classified as Hazardous according to criteria of National Occupational Health and Safety Commission (NOHSC), Australia.

Not classified as Dangerous Goods according to the Australian Code for the Transport of Dangerous Goods by Road and Rail. (7th edition) **New Zealand:** 

Diphenylamine is classified as 6.1C(oral) 6.1C(dermal) 6.1C(inhalation) 6.4A 6.9B (oral) 9.1A(crustacean) 9.1D(algal) 9.1D(fish) 9.3B according to the Hazardous Substances (Minimum Degrees of Hazard) Regulations 2001, New Zealand.

Not classified as Dangerous Goods for transport according to the New Zealand Standard NZS 5433:2012 Transport of Dangerous Goods on Land.

### **GHS** label elements:

| Hazard Pictograms: : | No hazard pictogram is used. |
|----------------------|------------------------------|
| Signal word:         | No signal word is used.      |

| Hazard statement:                    | Harmful to aquatic life with long lasting effects.                |  |
|--------------------------------------|-------------------------------------------------------------------|--|
| Precautionary statement:             |                                                                   |  |
| Prevention:                          | Avoid release to the environment.                                 |  |
| Response:                            | Not applicable.                                                   |  |
| Storage:                             | Not applicable.                                                   |  |
| Disposal:                            | Dispose of contents/container in corroding with local regulation. |  |
| Other hazards which do not result in | Not applicable.                                                   |  |

classification:

|  | ngredients |  |  |
|--|------------|--|--|
|  |            |  |  |

| 3. Composition/information on ingredients |          |          |  |
|-------------------------------------------|----------|----------|--|
| Components                                | CAS No.  | Percent  |  |
| Highly refined mineral oil (C15 - C50)    | Mixture  | 80 - 99% |  |
| Diphenylamine                             | 122-39-4 | 0 - 2%   |  |

| 4. First aid measures                    |                                                                                            |
|------------------------------------------|--------------------------------------------------------------------------------------------|
| Inhalation:                              | No specific first aid measures are required. If exposed to excessive levels of material in |
|                                          | the air, move the exposed person to fresh air. Get medical attention if coughing or        |
|                                          | respiratory discomfort occurs.                                                             |
| Skin:                                    | No specific first aid measures are required. As a precaution, remove clothing and shoes if |
|                                          | contaminated. To remove the material from skin, use soap and water. Discard                |
|                                          | contaminated clothing and shoes or thoroughly clean before reuse.                          |
| Eye:                                     | No specific first aid measures are required. As a precaution, remove contact lenses, if    |
|                                          | worn, and flush eyes with water.                                                           |
| Ingestion:                               | No specific first aid measures are required. Do not induce vomiting. As a precaution, get  |
|                                          | medical advice.                                                                            |
| Symptoms caused by exposure:             | Not available.                                                                             |
| Medical Attention and Special Treatment: | Treat symptomatically.                                                                     |

| 5. Fire-fighting measures             |                                                                                                  |
|---------------------------------------|--------------------------------------------------------------------------------------------------|
| Suitable extinguishing media:         | Use water fog, foam, dry chemical or carbon dioxide (CO <sub>2</sub> ) to extinguish flames.     |
| Extinguishing media which must not be | Not available.                                                                                   |
| used for safety reasons:              |                                                                                                  |
| Specific hazards arising from the     | Highly dependent on combustion conditions. A complex mixture of airborne solids, liquids,        |
| chemical:                             | and gases including carbon monoxide, carbon dioxide, and unidentified organic                    |
|                                       | compounds will be evolved when this material undergoes combustion.                               |
| Special protective equipment and      | This material will burn although it is not easily ignited. For fires involving this material, do |
| precautions for fire fighters:        | not enter any enclosed or confined fire space without proper protective equipment,               |
|                                       | including self-contained breathing apparatus.                                                    |

### 6. Accidental release measures

| Personal    | precautions,     | protective | Avoid build up of vapor. Ensure sufficient supply of air. Avoid contact with eyes or skin. |  |
|-------------|------------------|------------|--------------------------------------------------------------------------------------------|--|
| equipment a | and emergency pr | ocedures:  | Contact with water - danger of sliding. Wear appropriate personal protective equipment     |  |
|             |                  |            | and clothing to prevent exposure. Increase ventilation. Evacuate all unprotected           |  |
|             |                  |            | personnel. Eliminate all sources of ignition in vicinity of spilled material.              |  |

Environmental precautions:If leakage occurs, dam up. Prevent surface and ground-water infiltration, as well as ground<br/>penetration. Prevent from entering drainage system. If accidental entry into drainage<br/>system occurs, inform responsible authorities.Methods and materials for containment<br/>and cleaning up:Stop the source of the release if you can do it without risk. Contain release to prevent<br/>further contamination of soil, surface water or groundwater. Clean up spill as soon as<br/>possible, observing precautions in Exposure Controls/Personal Protection. Use<br/>appropriate techniques such as applying non-combustible absorbent materials or pumping.<br/>Where feasible and appropriate, remove contaminated soil. Place contaminated materials<br/>in disposable containers and dispose of in a manner consistent with applicable regulations.

| 7. Handling and storage                    |                                                                                               |  |  |
|--------------------------------------------|-----------------------------------------------------------------------------------------------|--|--|
| Precautions for safe handling:             | Containers, even those that have been emptied, may contain explosive vapors. Do NOT           |  |  |
|                                            | cut, drill, grind, weld or perform similar operations on or near containers. Electrostatic    |  |  |
|                                            | discharge may be generated during pumping - this may result in fire. Ensure electrical        |  |  |
|                                            | continuity by bonding and grounding (earthing) all equipment.                                 |  |  |
| Conditions for safe storage, including any | Do not store in open or unlabeled containers. Store in a cool, dry place with adequate        |  |  |
| incompatibilities:                         | ventilation. Keep away from open flames and high temperatures.                                |  |  |
| Storage regulation                         | Container is not designed to contain pressure. Do not use pressure to empty container or it   |  |  |
|                                            | may rupture with explosive force. Empty containers retain product residue (solid, liquid,     |  |  |
|                                            | and/or vapor) and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill,       |  |  |
|                                            | grind, or expose such containers to heat, flame, sparks, static electricity, or other sources |  |  |
|                                            | of ignition. They may explode and cause injury or death. Empty containers should be           |  |  |
|                                            | completely drained, properly closed, and promptly returned to a drum reconditioned or         |  |  |
|                                            | disposed of properly.                                                                         |  |  |

| 8. Exposure controls/personal protection                                                                            |                 |                |                |

No exposure standards have been established for this material, however, the TWA National occupational Health And Safety Commission (NOHSC) exposure standards for Isopropyl alcohol is 10mg/m<sup>3</sup>.

TWA (Time Weighted Average): The average airborne concentration of a particular substance when calculated over a normal eight-hour working day, for a five-day week.

Appropriate engineering controls:

Provide sufficient ventilation to keep airborne levels as low as possible. Where vapours or mists are generated, particularly in enclosed areas, and natural ventilation is inadequate, a local exhaust ventilation system is required.

### Personal protective equipment: Eye/face protection:

No special eye protection is normally required. Where splashing is possible, wear safety

glasses with side shields as a good safety practice.

No special protective clothing is normally required. Where splashing is possible, select protective clothing depending on operations conducted physical requirements and other substances in the workplace.

No respiratory protection is normally required. No respiratory protection is ordinarily required under normal conditions of use. In accordance with good industrial hygiene practices, precautions should be taken to avoid breathing of material..If user operations generate an oil mist, determine if airborne concentrations are below the occupational exposure limit for mineral oil mist. If not, wear an approved respirator that provides adequate protection from the measured concentrations of this material. For air-purifying respirators use a particulate cartridge. Use a positive pressure air-supplying respirator in circumstances where air-purifying respirators may not provide adequate protection. Suggested materials for protective gloves include: Neoprene, Nitrile Rubber.

Hand protection:

Skin protection:

**Respiratory protection:**

## 10. Stability and reactivity

| Reactivity:                         | Stable under recommended transport or storage conditions.                             |
|-------------------------------------|---------------------------------------------------------------------------------------|
| Chemical stability:                 | Stable under normal temperatures and pressures.                                       |
| Possibility of hazardous reactions: | Contact with strong oxidants.                                                         |
| Conditions to avoid:                | Incompatible materials.                                                               |
| Incompatible materials:             | Strong acids or strong oxidizing agents, such as chlorates, nitrates, peroxides, etc. |
| Hazardous decomposition products:   | Carbon monoxide, carbon dioxide, and unidentified organic compounds.                  |

|                                     | New Zealand:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|                                     | Product Disposal                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|                                     | Product wastes are controlled wastes and should be disposed of in accordance with all applicable local and national regulations. This product can be disposed through a licensed commercial waste collection service. In this specific case the product is a combustible substance and therefore can be sent to an approved high temperature incineration plant for disposal. Personal protective clothing and equipment as specified in Section 8 of this SDS must be worn during handling and disposal of this product. The ventilation requirements as specified in the same section must be followed, and the precautions given in Section 7 of this SDS regarding handling must also be followed. Do not dispose into the sewerage system. Do not discharge into drains or watercourses or dispose where ground or surface waters may be affected. In New Zealand, the disposal agency or contractor must comply with the New Zealand Hazardous Substances (Disposal) Regulations 2001. Further details regarding disposal can be obtained on the EPA New Zealand website under specific group |
|                                     | standards.<br>Container Disposal                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|                                     | The container Disposal<br>The container or packaging must be cleaned and rendered incapable of holding any<br>substance. It can then be disposed of in a manner consistent with that of the substance it<br>contained. In this instance the packaging can be disposed through a commercial waste<br>collection service. Alternatively, the container or packaging can be recycled if the hazardous<br>residues have been thoroughly cleaned or rendered non-hazardous. In New Zealand, the<br>packaging (that may or may not hold any residual substance) that is lawfully disposed of by<br>householders or other consumers through a public or commercial waste collection service is<br>a means of compliance with regulations.                                                                                                                                                                                                                                                                                                                                                                  |

### 14. Transport information

### Australia:

Not classified as Dangerous Goods according to the Australian Code for the Transport of Dangerous Goods by Road and Rail. (7th edition)

Not classified as Dangerous Goods by the criteria of the International Air Transport Association (IATA) Dangerous Goods Regulations for transport by air.

Not classified as Dangerous Goods by the criteria of the International Maritime Dangerous Goods Code (IMDG Code) for transport by sea.

### New Zealand:

Not classified as Dangerous Goods for transport according to the NZS 5433:2012 Transport of Dangerous Goods on Land.

Not classified as Dangerous Goods by the criteria of the International Maritime Dangerous Goods Code (IMDG Code) for transport by sea. Not classified as Dangerous Goods by the criteria of the International Air Transport Association (IATA) Dangerous Goods Regulations for transport by air.

### **15. Regulatory information**

### Safety, health and environmental regulations specific for the product in question

### Australia:

Not classified as Hazardous according to criteria of National Occupational Health and Safety Commission (NOHSC), Australia. Not classified as a Scheduled Poison according to the Standard for the Uniform Scheduling of Medicines and Poisons (SUSMP)

### New Zealand:

Not classified as Hazardous according to the New Zealand Hazardous Substances (Minimum Degrees of Hazard) Regulations 2001.

### Australia HVIC: Listed substance

Not available.

### New Zealand Location Test Certificate

Subject to Regulation 55 of the Hazardous Substances (Classes 1 to 5 Controls) Regulations a location test certificate is required when quantity greater than or equal to those indicated below are present.

| Hazard Class   | Quantity beyond which controls apply | Quantity beyond which controls apply  |
|----------------|--------------------------------------|---------------------------------------|
|                | for closed containers                | when use occurring in open containers |
| Not Applicable | Not Applicable                       | Not Applicable                        |

### **New Zealand Approved Handler**

Subject to Regulation 56 of the Hazardous Substances (Classes 1 to 5 Controls) Regulations, the substance must be under the personal control of an Approved Handler when present in a quantity greater than or equal to those indicated below.

| Class of substance   | Quantities                                             |                        |
